

sdtravel

24/7
for up to
90 days

sdtravel is a high-performance self-disinfecting coating which contains a unique antimicrobial active that can inactivate viruses and kill bacteria on contact, preventing germs from breeding on treated surfaces. Protective effect lasts for 90 days. This handy-sized bottle fits nicely in pockets, handbags and pouches, protecting you on-the-go!

Good for personal items like mobile phones, laptops, passes and wallets, which collect germs easily

Communal touchpoints like door and tap handles, switches, remote controls, lift buttons etc

Used at Changi Airport, HDB lifts, ATMs, childcare centres and other commercial and public spaces

One tiny bottle can last about 140 sprays. One spray goes a long way!

HOW SDTRAVEL WORKS

Needle-like antimicrobial active ruptures germ cell's membranes, inactivating viruses and killing bacteria

Coating is molecularly bonded to treated surface; preventing breeding of germs

Protective or self-disinfecting effect lasts for 90 days; not removed by regular cleaning

Manufactured in the USA, sdst's active ingredient is classified as a quarternary ammonium compound; this compound group is recommended by both the US CDC and US EPA to be effective against SARS-CoV-2.

(Refer to the attached factsheet for more details of sdtravel and how to use)
